 run the two Preceding E. & W. lines over again at a greater

T 35. N. B. 2. E. 2nd Mer. Indiana.

var. I should have done so at the time I run them, had I not supposed running as I was so near at right angles with the true Meridian. that the work would finally close better on the Mer. At the West Bound^{ry} of the district — and further. It was my intention at that time, pursuant to my instructions as I supposed, to run all my lines as near as practicable to the true Mer. An idea that I have long since entirely abandoned, and confined myself entirely to closing the old surveys.
